Annual Report 2020-21

It was an unprecedented year that changed the world in many ways. Thanks to the support of donors like you, St. Jude was able to provide care and comfort to those we serve, continuing to help patients in need and helping our centers throughout the pandemic.

We are happy to share our work, activities and successes for the last year in our Annual Report 2020-21.

Collaborations & Partnerships

St. Jude’s network of collaborations continues to grow and evolve, reaching new heights and achieving important milestones.

Cancer survivors require a strong support system to help them resume a normal life after cancer treatment. St. Jude works to ensure this support system is in place, by collaborating with organizations that provide services to cancer survivors.

One of our collaborative partners is the St. Jude Children’s Research Hospital, which provides support for cancer survivors.

The Children’s Cancer Group is another important partner, providing support and resources for cancer survivors.

We also partner with organizations such as the National Comprehensive Cancer Network (NCCN) and the American Society of Clinical Oncology (ASCO), which provide guidelines and resources for cancer survivors.

One of our most important partners is the Childhood Cancer Survivorship Database, which collects and analyzes data on long-term outcomes for childhood cancer survivors.

In the past year, we have been able to expand our collaborations with partners around the world, providing additional support and services to cancer survivors.

St. Jude in the News

One of our children, a leukemia patient, was featured in a news story about his fight against cancer.

The story highlighted the challenges he faced during treatment, as well as his remarkable resilience and determination.

With Love, St. Jude Family

Thank you for your support. Together we can make a difference in the lives of children who are facing cancer.
